Sales-slip OCR · 2026-06-08 11:49 · NVIDIA RTX A2000 8GB Laptop GPU, 8192 MiB

Task: extract the total amount from German grocery/gas sales slips. Each model receives the raw JPEG (resized to ≤ 1500 px) and a fixed prompt. Accuracy = fraction of the 3 test images where the extracted value matches the ground truth encoded in the filename (e.g. *slip0_7949.jpg* $\rightarrow$ 79,49 €).
